

WEATHER GUARD® NEW VAN EQUIPMENT RECOMMENDED INSTALLATION TIME GUIDELINES

With quick installation features from slotted floor brackets and simplified accessory mounting brackets to pre-punched mounting holes on bulkheads and end panels, our totally rethought and redesigned van platform puts you in the position to score maximum productivity for you and your customers.

Listed are recommended installation times for WEATHER GUARD® New Van Equipment. Installation times are provided to assist you in quoting assembly and installation costs. Times are based on the assembly and installation of single items only. These times are based on using an installer who has had prior experience assembling and installing truck and van equipment and would not be accurate for an installer with little or no experience. Times will vary depending on the repetitiveness of the installation and the expertise of the installer. Experience will allow you to streamline these times.

Please note the following about the recommended installation times:

1. All tools and products required for the installation should be readily available and in the vicinity of the installer. It may be necessary to budget time to bring material and equipment to the work area.
2. Equipment is mounted according to the product's instructions. The positioning of the product and accessories in/on the vehicle has been determined prior to beginning the installation.
3. Power tools were used where possible during assembly and installation. Otherwise hand tools were used.
4. No time is included for clean up after installation is completed.
5. Times were determined by a one-man assembly/installation when possible. If two men were needed, then both were fully utilized throughout the assembly/installation process.
6. The assembly and installation time listed is in time required to complete the product installation (1 man hour = 60 minutes). No time included for breaks, etc.
7. Times listed are for original installation in a stripped down work/cargo van. When an installation is done with a passenger van these times will increase due to the difficulty of working around the vehicle's interior trim panels and headliners.
8. Factory installed or after-market options (Example: Rear air conditioning/rear heater/nav systems/ stereos/ two-way radios/ phone kits/etc.) may change installation times.

**Questions? Please feel free to call for assistance — we're happy to help.

IMPORTANT GENERAL NOTES:

1. Before assembling and installing any equipment, carefully examine the vehicle to ensure that you do not damage or interfere with vehicle wiring, brake lines, gas lines, gas tanks, air-conditioning, or other installed items which could result in an un-safe installation or damage to the vehicle. Since the vehicle OEM determines the location of these items and they can change without notice, the best time to verify these is at the start of every installation.
2. Before starting the installation, determine where equipment will be located in the van and where components and accessories will be mounted to shelves.
3. At the completion of the installation, re-check all fasteners for tightness. Road test the vehicle and re-check all fasteners for tightness a second time.

EQUIPMENT CATEGORY NOTES

Bulkheads: The times listed are to assemble and install the bulkhead in an empty cargo van. The bulkhead door and passenger side panel are pre-punched to mount WEATHER GUARD® accessories.

RAPID MOUNT™ Shelving Units/ Drawer Units/Cabinets: The time shown is the time it takes to assemble and mount each unit to the floor and side-wall of an empty cargo van. Sidewall mounting brackets are normally used on this product. If it is necessary to add additional mounting brackets, add .2 man-hours for each bracket added. The shelf end panels and the wheel well base cabinets are pre-punched to accept WEATHER GUARD® accessories.

Standard (16" deep) shelf accessory mounting bracket kits (9996-3-01) are included with shelf-mounted accessories. If mounting to 13" deep shelves, use mounting kit 9993-3-01.

Accessory Shelves/Dividers/Work Cover/Retainer Lips/ Flat Shelves and Other Accessories: Times shown for these items are the times it takes to assemble and install these items on standard WEATHER GUARD® Products using the pre-punched mounting holes.

Mount Red Zone Accessories with the round screw heads facing towards the interior of the shelf to allow adjustability after initial installation.

PACK RAT® Drawer Units and ITEMIZER® Drawer Units: Times for these drawer units do not reflect the time involved in mounting to the bed of a vehicle that has carpet or some type of flooring. The installation time for all PACK RAT® and ITEMIZER® drawer units is identical. The 3 and 4 compartment steel drawer unit requires 3 or 4 people to pick them up and set them into the van, and the installation times include an extra 0.2 man hours for this.

Van Ladder Racks: The times listed are to assemble and install WEATHER GUARD® van racks on full size and compact-size vans per the product instruction sheets. Installation time of clamp kits and cross-member kits is included in total ladder rack time when these items are included.

Van Packages: The times listed are for installing the packages as laid out in the WEATHER GUARD® website (www.weatherguard.com) and equipment catalog. Time has been included to account for the extra reinforcing ribs and drilling through the floor of the van where necessary.
